

# enforcer

**BUILT  
WITH  
PRIDE™**

## Heavy-duty, high-performing disinfecting system

An automatically activated drive-over system designed to reduce cross-contamination from moving vehicles.

This surface mounted system comprises of four (optional) ramps and a spray platform. Spray bars, side screens, entry and exit sensors and a high-performance chemical dosing unit with pump and a control panel plus a water tank from 660 gallons. Alternatively, the system can be inset into the ground to save space and cost by removing the ramps.

The automatic sensors activate strategically placed nozzles situated to the side and below the vehicle. Covering a spray area of 6 feet, this system ensures the entire vehicle is covered. At up to 45 PSI, the Enforcer can be effective even in adverse weather conditions whilst side screens reduce overspray and collect wastewater in an overflow port for collection.

This is the ideal choice for agricultural and industrial sites where biosecurity is a major concern.

### Key Points

Galvanised side screens and ramps make this a high-quality piece of equipment. Adjustable dosing also makes it easily adaptable to suit any commonly used chemical disinfectant, acid or alkaline, within specified pH levels.

- 6 foot spray area
- Integral water tank from 660 gallons
- Two-way traffic activation setting
- Drain valves to spray area for collection
- Can resist 22,000 pounds per axle as standard

45 PSI

120v, SINGLE PHASE

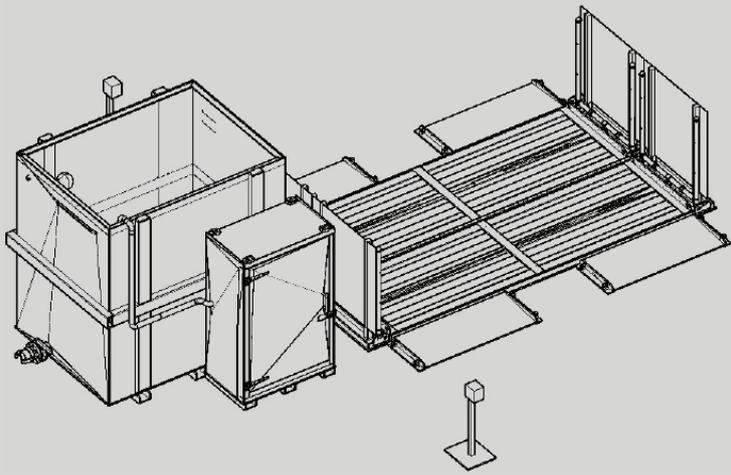

MOBILE

NO OPERATOR

EASY MAINTENANCE

## Specifications

Sections	Sizes
Spray Platform	12.8' x 6.9' x .2' 1543 lbs, 51.5 Gal Capacity
Side Screens (Galvanised)	3.53' x 3.36' 31 lbs (each)
Ramps (x4)(Galvanised)	1.71' x 4.5' x .2' 44 lbs (each)
Wash Pump	1 HP
Pump Control Cabin	5.54' x 3.37' x 2.06'
Settlement Tank	6.56' x 3.28' x 4.1' 992 lbs, 660 Gal Capacity
Water Requirement	3/4" Water Supply Top Up
Power Requirement	120v, Single Phase

Suitable for all vehicle types

Targeted spray for maximum effectiveness

IP65 Control panel

Multi dosing option

## Customer Requirements

- Clear lifting zone for offloading with crane mounted truck
- Compacted level hardcore or concrete / tarmac base for the system and associated ramps and tanks
- A constant mains water supply for installation and operation
- Water and disinfectant readily available for testing
- Nominated site personnel to be available for training

## Additional Information

We supply:

- Free of charge site consultations
- Technical drawings, general RAMS & lifting plans
- Maintenance contracts for purchased units
- Technical support from trained and experienced engineers
